(54) **SOLID PREPARATION CONTAINING INHIBITOR
OF SECRETION OF ACID IN STOMACH**

(57) Abstract:

PURPOSE: To obtain the title preparation of tablet, capsule, granule, etc., having excellent stability by blending an inhibitor of secretion of acid in the stomach such as benzimidazole-based compound with magnesium oxide and mannitol.

CONSTITUTION: 1 pt.wt. inhibitor of secretion of acid in the stomach (especially sodium salt of

2-[[4-(3-methoxypropoxy)-3-methylpyridine-2-yl]methylsulfinyl]-1H-benzimidazole) is blended with 0.2-5 pts.wt. magnesium oxide and 1.5-5 pts.wt. mannitol to give the title preparation. The preparation has improved stability by addition of magnesium oxide and mannitol, is rapidly disintegrated under a humidifying condition and in an acidic-neutral aqueous solution, is not extremely discolored and readily pharmaceutically manufactured.
